

Current Operational Plan for Wolverine Plating Corp

June 10, 2020

Contact Person: Tom Braciszewski, President
Email: tom@wolverineplating.com **Phone:** (586) 771-5000 ext 212
Secondary Contact: Jason Holden, Shipping and Receiving Mgr
Email: jason@wolverineplating.com **Phone:** (586) 771-5000 ext 214

Current Status:

Wolverine Plating has increased production to at least four days per week, Monday through Thursday, and will operate on Fridays and Saturdays as needed based on customer needs. Shipping and Receiving will be operating all five days; Monday through Thursday from 7:00 am to 5:00 pm, and Friday from 7:00 am to 3:00 pm.

Please note that advanced lead times are critical to ensuring we can meet customer needs, and much appreciated as we work to adjust our schedules.

We will post regular updates to our website, wolverineplating.com, as our production schedule is modified.

Wolverine Plating has been monitoring the situation through the U.S. Center for Disease Control (CDC). In order to minimize the chance of being infected by, or spreading, COVID-19, Wolverine Plating has instituted the activities recommended by the CDC including employee health screening, wearing masks, adhering to social distancing protocols, practicing enhanced hygiene and enhanced facility cleaning/sanitizing.

We have been in contact with our supply chain partners and do not anticipate any problems in meeting our customers' needs.

Thank you for your understanding, support, and patience during this difficult situation. We greatly appreciate your help as we work together to get through this crisis.
